weed wrangle[®] Indiana

We are excited to announce the first **Weed Wrangle[®] Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle[®] (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

weed wrangle[®] Indiana

We are excited to announce the first **Weed Wrangle[®] Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle[®] (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

weed wrangle[®] Indiana

We are excited to announce the first **Weed Wrangle[®] Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle[®] (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

weed wrangle[®] Indiana

We are excited to announce the first **Weed Wrangle[®] Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle[®] (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

weed wrangle[®] Indiana

We are excited to announce the first **Weed Wrangle[®] Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle[®] (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

weed wrangle[®] Indiana

We are excited to announce the first **Weed Wrangle[®] Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle[®] (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

weed wrangle[®] Indiana

We are excited to announce the first **Weed Wrangle[®] Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle[®] (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

weed wrangle[®] Indiana

We are excited to announce the first **Weed Wrangle[®] Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle[®] (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

weed wrangle[®] Indiana

We are excited to announce the first **Weed Wrangle[®] Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle[®] (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. We are excited to announce the first **Weed Wrangle[®] Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle[®] (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

weed wrangle[®] Indiana

We are excited to announce the first **Weed Wrangle[®] Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle[®] (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

weed wrangle[®] Indiana

We are excited to announce the first **Weed Wrangle[®] Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle[®] (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

weed wrangle[®] Indiana

We are excited to announce the first **Weed Wrangle[®] Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle[®] (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

weed wrangle[®] Indiana

We are excited to announce the first **Weed Wrangle[®] Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle[®] (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

GO GREEN!

By scanning the QR code to the left with your smart phone you can send us an email letting us know you would like to help us save money on printing costs and postage by receiving your newsletter via email.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

weed wrangle® Indiana

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

weed wrangle[®] Indiana

We are excited to announce the first **Weed Wrangle[®] Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle[®] (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

weed wrangle[®] Indiana

We are excited to announce the first **Weed Wrangle[®] Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle[®] (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

• • • • •

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.

A NEW PLANT BOUNTY!

Marshall County SWCD is happy to announce that we received a new grant from the Arrow Head RC & D this spring and we will be offering a cost share to remove the invasive Ornamental Pear trees that are creating havoc in our wooded areas! These troublesome trees are EVERYWHERE, and by offering this cost share, we can help you pay for the costs of removing them on your property and replacing with much more desirable native species of trees. We will be releasing details of this program soon, so as the spring planting season gets started, help us get the word out to **STOP** planting these invasive pears (they are still available in box stores and garden centers unfortunately) and to choose beneficial native trees for your property! Watch our FB page and website for more information.

2021 CWI GRANT PROGRAMS

The Marshall County SWCD in partnership with the St. Joseph County SWCD received a new Clean Water Indiana (CWI) grant and will be accepting applications for conservation programs to be implemented through 2023. These programs include cost share for pollinator habitat, cover crop and filter strip installations, and nutrient management practices. The CWI Grant is administered through the Indiana State Department of Agriculture Division of Soil Conservation and the money comes from the collection of cigarette taxes. This grant will help the SWCD help you cover costs to implement these important conservation practices and show you how they can save you time and money in the future. Most importantly, they will help you keep your soil healthy and your water clean, because as we know....NOTHING IS MORE IMPORTANT!!!

CONSERVATION CONVERSATIONS

We are excited to announce the first **Weed Wrangle® Indiana** being held here in Marshall County! The event will be happening on Saturday April 17th from 10 am to 12 pm at the Marshall County Memorial Forest. A Weed Wrangle® (www.weedwrangle.org) is an official national event, and is a one-day, area-wide, volunteer effort to help rescue our public parks and green spaces from non-native invasive species through hands-on removal of especially harmful trees, vines, and flowering plants. We will be working with a representative from the Indiana Invasives Initiative. She will be explaining how non-native invasive plants are causing damage to woodlands and wildlife habitats and showing us a few examples on this county property. Methods of removal will be explained, as well as best management practices. We will be able to spread out and social distance, a great activity during these crazy times! For those who don't know where the

Memorial Forest is located, it is in Culver, at the corner of Highway 17 and 14th Road. We ask you to register in advance if you can, check our website for more information. At the Weed Wrangle, we will also be talking about a call-out meeting for a **CISMA**. A **CISMA** is a **Cooperative Invasive Species Management Area**. It will be a local group (we are hoping to partner with the St. Joseph County SWCD on this) that collectively manages the problem of invasive plants spreading across our landscape. It will hold regular activities like Weed Wrangles to educate and create awareness. To find out more about CISMA's, check out the Southern Indiana Cooperative Invasive Management (SICIM) website, www.sicim.info/cismas. If you can't make it to the Weed Wrangle, go to our website and fill out our new form, we will keep you updated on CISMA information. It's a great way to participate in local conservation!!!

SPRING 2021

UPCOMING EVENTS

EARTH DAY!!! We will be giving away **50 Free Trees for the Birds and the Bees!** This year we are distributing Bur and Red Oaks. Why oak trees? Because oaks are a **KEYSTONE** plant for native insects, thus being a **KEYSTONE** plant for many birds that feed their chicks the caterpillars that Oaks support. **Every** yard should have an oak tree and the MCSWCD wants to help that happen by giving 50 of them away for Earth Day! We will be holding a drawing on our FB page for 10 4' potted oaks and then will be distributing the remaining 40 seedlings at our Weed Wrangle Event and from the office. Watch our FB page or check our website for details!

SEED GIVE-AWAY

As in past years, Marshall County SWCD will have free food plot and pollinator seed available, along with wildlife sunflowers. All will be available in gallon bags, 2 per customer. Distribution will be held a bit differently due to Covid concerns. We are asking anyone coming in to pick up seed call a minimum of 30 minutes ahead of time. Pick up will start **April 8th**. Office phone is 574-936-2024 x 3.
